Education

SRM University <i>Bachelor of Technology in Information Technology (CGPA: 9.02)</i>	Jun 2022 – May 2026
Seventhday Adventist <i>Higher Secondary - Computer Science (Percentage: 84)</i>	Jun 2021 – May 2022

Skills Summary

Languages: HTML, CSS, JavaScript, Python, C/C++
Frameworks: Node.js, Express.js, React.js, Mongoose, Ejs template
Database: MongoDB
Developer Tools: Visual Studio Code, Postman, Git, Github
Soft Skills: Adaptability, Continuous learning, Time Management, Problem solving

Experience

Global Info Technologies <i>Full Stack Developer</i>	Oct 2024 – Dec 2024
- During my internship at Oasis Infobyte. Designed and developed a fully functional website using the MERN stack (MongoDB, Express.js, React.js, Node.js). - Working in a Collaborated with cross-functional teams to gather requirements and implement user-friendly features to enhance user experience. - Created RESTful APIs to enhance functionality, streamline data flow, and integrate third-party services into existing systems. - Created responsive and visually appealing UI components using React and CSS frameworks.	

Projects

Recipe-Database-Application (MERN stack) MongoDB, Express.js, React.js, Node.js	
- Developed a full-stack Recipe Management Application using the MERN stack (MongoDB, Express.js, React.js, Node.js), enabling users to create, save, and manage recipes with secure JWT authentication. - Deployed on Render for high availability and performance, featuring a responsive UI and efficient MongoDB data handling for seamless recipe and user management.	
Mini-Ecommerce-Website (MERN stack) MongoDB, Express.js, React.js, Node.js	
- Built a Mini ecommerce Application using the MERN stack (MongoDB, Express.js, React.js, Node.js), with a React.js frontend and MongoDB for the product management, including item browsing, cart functionality, and responsive design. - Integrated secure API routes with Express.js and Node.js, and deployed on Render for high availability and reliable performance.	
Daily-Journal-Website MongoDB, Express.js, ejs template	
- Developed a Daily Journal Website using MongoDB for data storage and Express.js for server-side operations, with a Bootstrap-based responsive design. - Utilized EJS templating for dynamic web pages and deployed the app on Render for scalability and reliable performance.	

Certifications

- Big Data Computing - NPTEL
- The Complete 2024 Web Development Bootcamp - Udemy
- Advanced React - Coursera - Meta
